## Important Remarks

1. Obtaining answers from an app or the internet is considered cheating and will result in an F for the entire course.
2. The last day to register for MyMathLab is $\mathbf{1 1 : 5 9 p m}$ on Friday, $\mathbf{2 / 3} / \mathbf{2 3}$. If you are waiting for financial aid, you can get free temporary access to MyMathLab for 14 days by following the registration instructions I gave you. If you register for MyMathLab with the 14 day temporary access, the deadline to purchase the access code and register it is also 11:59pm on Friday, 2/3/23.
3. There is one assignment for each section of the textbook we cover. Also, there is one set of practice problems for each of the 4 tests. The practice problems for the tests count towards your homework grade. There are 20 assignments altogether. The practice problems for the final exam will be emailed to you and are not part of your homework grade.
4. To help you obtain a high grade for your homework, I have decided to do the following.

- I will drop the lowest 3 assignment grades. These drop grades are intended to be used for emergencies such as illnesses, login issues, and internet issues.
- I will allow an unlimited number attempts for each problem.
- Due to the benefits above, there will be no extensions granted.

5. Do not wait until the last minute to complete an assignment. It is best to complete each assignment soon after the material for it has been completed.
6. Please note that the individual assignment grades shown in MyMathLab are accurate. However, the overall homework grade shown in MyMathLab is not because the lowest 3 grades are not dropped until the end of the term. To determine your overall homework grade at any point during the term, drop your 3 lowest assignment grades and then average the remaining grades. Any assignment that is labeled "Past Due" is counted as a 0 .
